

SAI REDDY A

Full Stack Developer (.NET Core | Angular | Azure)

Hyderabad, India | +91 8978924981 | saireddy.1.1919@gmail.com | LinkedIn: [saireddy-dotnetfs](#)

PROFESSIONAL SUMMARY

Full Stack .NET Developer with 4+ years of experience building scalable web applications using C#, ASP.NET Core, Angular, and SQL Server across ERP, fleet management, and SaaS billing platforms. Skilled in REST API design, microservices, cloud services (Azure, AWS), and database optimization. Experienced in leading small development teams, production support, and end-to-end delivery in Agile environments. Strong grasp of OOP principles and a track record of translating business requirements into reliable technical solutions.

TECHNICAL SKILLS

Frontend: Angular, TypeScript, JavaScript, jQuery, HTML5, CSS3, Bootstrap, Ajax, React JS

Backend: C#, ASP.NET, ASP.NET Core, MVC Core, WPF, LINQ, Microservices

Database & Cloud: SQL Server, SQLite, Azure, AWS, Redis Cache

Frameworks & Tools: .NET Core, ADO.NET, Entity Framework, Dapper, PetaPoco, Hangfire Jobs, Azure Functions, Flutter, Python

Dev Tools: Visual Studio, Visual Studio Code, Postman, Swagger, Source Tree

Version Control: Git, GitHub, Bitbucket

Methodologies: Agile, Waterfall, Monolithic, Microservices, Event-Driven Architecture

Testing & Quality: Unit Testing, xUnit, Integration Testing, SonarQube, Snyk, Debugging

Monitoring & Support: Azure App Insights, OpenTelemetry, Zenduty, Grafana, Production Support

Integrations: OAuth, Firebase, Supabase, Twilio, SMTP, AWS SES, Netlify, Render, AWS Location Service, SignalR, WebRTC

Domains: Fleet Management, Process Automation & ERP, SaaS Billing & Subscription Management

Languages Known: Telugu, English, Hindi, Tamil

PROFESSIONAL EXPERIENCE

Software Engineer | Keka Technologies Private Ltd

Nov 2025 - Present | Hyderabad, India

- Improved unit and integration test coverage by 80% across the billing and subscription platform, increasing release confidence and cutting production regressions.
- Reduced API response time by 20-30% by re-architecting billing event processing from synchronous calls to an event-driven model using Azure Functions.
- Built REST APIs and Angular UI for invoice generation, subscription lifecycle, and payment processing that gate feature access across Keka's HR SaaS platform based on active subscription plans.
- Automated recurring billing cycles and subscription renewals using Hangfire jobs, eliminating manual invoice generation.
- Reduced database load for high-traffic subscription/plan lookups by introducing Redis Cache.
- Delivered features every sprint as part of a 9-member cross-functional team (Product Manager, Engineering Manager, Team Lead, Senior/Software Engineers, QA) following 1-month Agile sprints.
- Resolved production incidents on-call, using Zenduty alerts and Grafana dashboards to triage and fix exceptions in live billing workflows.

Software Developer | Solve Corp

Apr 2023 - Oct 2025 | Chennai, India

- Delivered 20+ REST APIs and modules for a proprietary multi-tenant Enterprise Machine Management (EMM) product, leading a team of 4 developers.
- Improved database performance by 15% by designing and optimizing stored procedures.
- Reduced debugging and error-resolution time by implementing dynamic logging across the application lifecycle.

- Developed and maintained full-stack applications using ASP.NET Core MVC, Angular, and SQL Server, and managed sprint planning, code review, and client communication for the team.

PROJECT DETAILS

Billing & Subscription Management Platform (Internal Tool)

Client: Keka Technologies Private Ltd (Proprietary / Internal)

Domain: SaaS Platform - Billing, Subscription & Plan-Based Feature Access (foundation module for Keka's HR SaaS product)

Technologies: C#, .NET Core, PetaPoco, Dapper, Angular, SQL Server, Azure, Azure Functions, Redis Cache, Hangfire Jobs, Microservices, Event-Driven Architecture, SMTP, AWS SES

Duration: Nov 2025 - Present

Team Size: 9 (Product Manager, Engineering Manager, Team Lead, Senior Software Engineer, 5 Software Engineers, QA Engineer)

Roles & Responsibilities

- Contributing as a Full Stack Developer on the platform's core billing engine, which controls whether HR platform customers can access specific modules based on their active subscription plan.
- Designed and built REST APIs and Angular components for invoice generation, subscription plan management, and payment tracking.
- Used Dapper and PetaPoco for efficient data access against SQL Server; deployed and managed services on Azure.
- Automated recurring billing operations (invoice generation, renewals) using Hangfire scheduled jobs.
- Implemented Azure Functions and event handling for asynchronous processing across microservices.
- Applied Redis Cache to reduce database load for frequently accessed plan/subscription data.
- Set up automated billing and invoice notifications via SMTP and AWS SES.
- Followed Agile methodology with 1-month sprints; picked up and delivered assigned features each cycle as part of a 9-member team.
- Provided on-call production support, triaging incidents flagged through Zenduty alerts and monitoring application health via Grafana dashboards.

Vehicle Performance Simulation (VPS)

Client: Indian Automobile Manufacturing Company

Domain: AD Process Automation

Technologies: .NET MVC Core, Dapper, Azure (SQL Server, Blob, Queue, App Service, App Insights)

Duration: Apr 2024 - Oct 2024 (Production Support: Ongoing)

Team Size: 5

- Worked as a full stack developer handling both frontend and backend development.
- Designed the application workflow and database schema using SQL Server.
- Used Dapper for data access and Azure Blob, Queue, and App Service for cloud operations.
- Performed unit and integration testing; used SonarQube and Snyk for code quality and security checks.
- Managed production support, tickets, and change requests, and delivered feature enhancements based on client feedback.

Enterprise Machine Management (EMM)

Client: Proprietary Product - Solve Corp

Domain: Process Automation & ERP Tools

Technologies: C#, Dapper, REST API, Angular TS, Azure (SQL Server, Queue, Blob, App Service, App Insights, OpenTelemetry)

Duration: Apr 2023 - Till Date

Team Size: 4

- Led design and development of APIs and multi-tenant applications; led a team of 4 developers.
- Designed secure, high-performance RDS database schemas and reviewed team code for quality standards.
- Coordinated with testers and clients on requirements, bug triage, sprint planning, and documentation.

Farm Division & Trial App (FD)

Client: Indian Automobile Manufacturing Company

Domain: Fleet Management (Tractor Diagnostics)

Technologies: C#, Angular TS, REST API, Dapper, AWS (DynamoDB, Cognito, S3, Lambda, CloudWatch), WPF, SQLite, XML

Duration: Feb 2022 - Feb 2024

Team Size: 5

- Served as App Developer, Full Stack Developer, and Technical Lead.
- Designed REST APIs and a field-usage Trial App (Toughpad app); led a small development team.
- Wrote test cases and performed unit/integration testing; maintained technical documentation.

Engine Development Center (EDC)

Client: Indian Automobile Manufacturing Company

Domain: AD Fleet Management

Technologies: C# REST API, Dapper, Angular TS, AWS (DynamoDB, Cognito, S3, Lambda, CloudWatch)

Duration: Apr 2023 - Feb 2024 (Production Support: Yes)

Team Size: 5

- Designed and developed APIs and responsive UI for Engine Power Train, Electric Vehicle, and Performance Monitoring modules.
- Handled test case design, unit/integration testing, security testing, and production support.

Real-Time Chat Application (Personal Project)

Domain: Communication / Messaging Platform

Technologies: C# .NET 6 Web API, SignalR, Angular 18/20, SQL Server, Bootstrap, WebRTC, Firebase

Duration: Jan 2025 - Mar 2025

- Implemented SignalR hubs for real-time messaging, typing indicators, and online/offline status.
- Integrated WebRTC for one-to-one video/audio calls and secure image/video sharing.
- Integrated Firebase Authentication for secure login; upgraded Angular from v18 to v20.

EDUCATION

Master of Business Administration (MBA) - Finance | Sri Shivani Institute of Management, Sathavahana University, 2023

Bachelor's Degree | Vivekananda Degree College, Siricilla (Sathavahana University), 2020

Diploma in Commercial Computer Practice (CCP) | S.R.R.S Government Polytechnic, Siricilla (Osmania University), 2018

CERTIFICATIONS

- Advanced Python - Jun 2025
- AI Agents for Beginners - May 2025
- ReactJS for Beginners - Apr 2025
- Introduction to Flutter Course - Apr 2025
- API Security Architect - Feb 2025
- Introduction to SQL - Jan 2025
- Foundational C# with Microsoft - Dec 2024
- Dot NET Full Stack Course, Skilliceborg Software Institution - Feb 2023
